

Conference Summary

Arun Bansil*¹

¹Physics Department, Northeastern University, Boston, USA

Abstract

In summarizing IXS-2015, I will present an overview of the major themes in inelastic x-ray scattering research discussed at the conference, and comment on areas that are likely to attract increased attention in our field in the future. I will also discuss a few selected highlights from the large body of work presented at IXS2015 as exemplars of the progress made since IXS-2013.
